Subject: Central Wire/Techalloy May 2015 Monthly Progress Report
To: John Nordine <nordine.john@epa.gov>

John--I have reviewed the May 2015 Monthly Progress Report submitted by Autumwood Consultants for the Central Wire/Techalloy facility in Union, IL. I have no comments.

In light of the recently identified issues with the water level data I recommend that a depth to water measurement be taken at the time the water-level data is downloaded. This level should be reported, and the data from the field measurement and the transducer data should be compared--both the water-level altitude a the time of the measurement as well as the change in altitude from the previous measurement--to help ensure the accuracy of the recorded data.
